

JVC releases two flagship model headphones

HA-S100N around-ear headphones with Hybrid Noise Cancelling and the world's first True Wireless earphones with WOOD diaphragm HA-FW1000T.

HA-FW1000T

HA-S100N

A new sound experience from JVC

Since its establishment in 1927, JVC has developed several proprietary technologies based on the philosophy of “Closer to the musical truth for the original sound”. In response to the growing global demand for high sound quality. We are pleased to introduce two flagship models so that you can experience the excellent sound quality created by JVC’s outstanding technologies.

Around-ear flagship model HA-S100N with Hybrid Noise Cancelling

These headphones come with Hybrid Noise Cancelling for immersive sound free from ambient noise. This excellent Noise Cancelling feature ensures a quiet listening environment allowing you to enjoy the highest quality sound.

Full touch control allows the simple operation of all functions with just the touch of a finger. Automatic ON/OFF and quick pairing with swivel function. The HA-S100N has high-quality protein leather in the headband and ear pads for a perfect fit and comfort during long listening. Includes swivel earcups and a two-way foldable design for easy carrying. Convenient Google Assistant and Google Fast Pair Compatible.

*Google Assistant compatible with Android OS smartphones

HA-FW1000T

True Wireless earphones HA-FW1000T with WOOD diaphragm

The HA-FW1000T is the world's first True Wireless earphones model to use our original sound-improving technology, a WOOD diaphragm, to achieve high sound quality comparable to wired earphones.

Equipped with several high-definition technologies, including K2 TECHNOLOGY, a unique high-quality sound technology developed in our studio. The sound quality that has been tuned by our studio engineers results in a detailed reproduction like the original sound.

This Absolute Sound is an enrichment of your music experience.

The staging of the mutual instruments with the right punch and detail, results in a natural reproduction. This matches any music, regardless of genre characterised by a natural and comfortable sound allowing you to listen for a long time.

HA-FW1000T has high-performance Hybrid Active Noise Cancelling; Qualcomm® Adaptive Active Noise Cancellation.

For high quality sound reproduction, Qualcomm® aptX™ Adaptive, a high-resolution audio codec compatible to 96 kHz/24bit*, is included.

HA-FW1000T Key Features

- The world's first True Wireless earbuds with Wood Dome carbon diaphragm
- Wood Dome carbon driver unit (11mm) of the same quality as high-end wired Wood headphones
- Unique K2 TECHNOLOGY enhances sound quality to get closer to its original state
- Reliable sound quality tuned by Japan's leading recording studio with sound professionals
- Newly developed Spiral Dot Pro earpieces for pure, clear sound. Includes 5 sets (S/MS/M/ML/L)
- New high-performance Hybrid Active Noise Cancelling; Qualcomm® Adaptive Active Noise Cancellation
- Qualcomm® aptX™ Adaptive compatible to 96 kHz/24bit*
- 100-step volume adjustment
- Acoustic Purifier to enhance sound clarity by diffusing noise
- Independent / Single side use and volume control available for each headphone
- Touch & Talk feature for quick conversation
- Attachment sensor for ease of use; helps prevent accidental touch operation
- Touch Control with beep feedback to assist in secure operation
- Auto-on & Auto-connect function
- Clear voice calls while wearing a mask
